

POWERING THE
FUTURE

Advancing Texas Clean Energy Leadership:

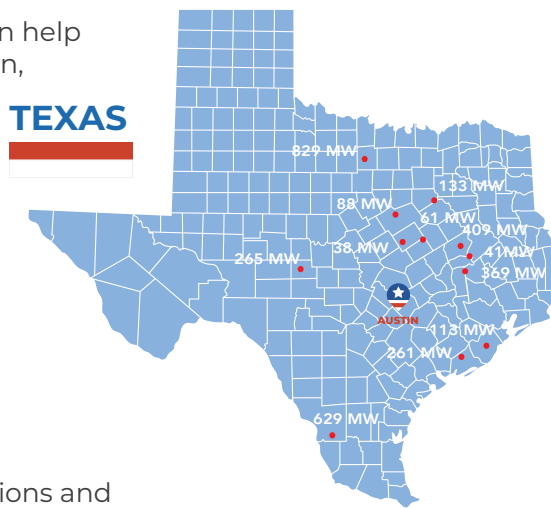

Texas leads the U.S. in renewable energy production—Elite Solar can help expand solar's share of Texas energy, supporting state goals for clean, affordable energy.

Sustainable, Ethical Supply Chains:

Our China-excluded manufacturing policy ensures ethical sourcing and aligns with California's commitment to human rights and fair labor. Our only presence in China is an office and logistics team.

Solar for Texas Resilience & Equity:

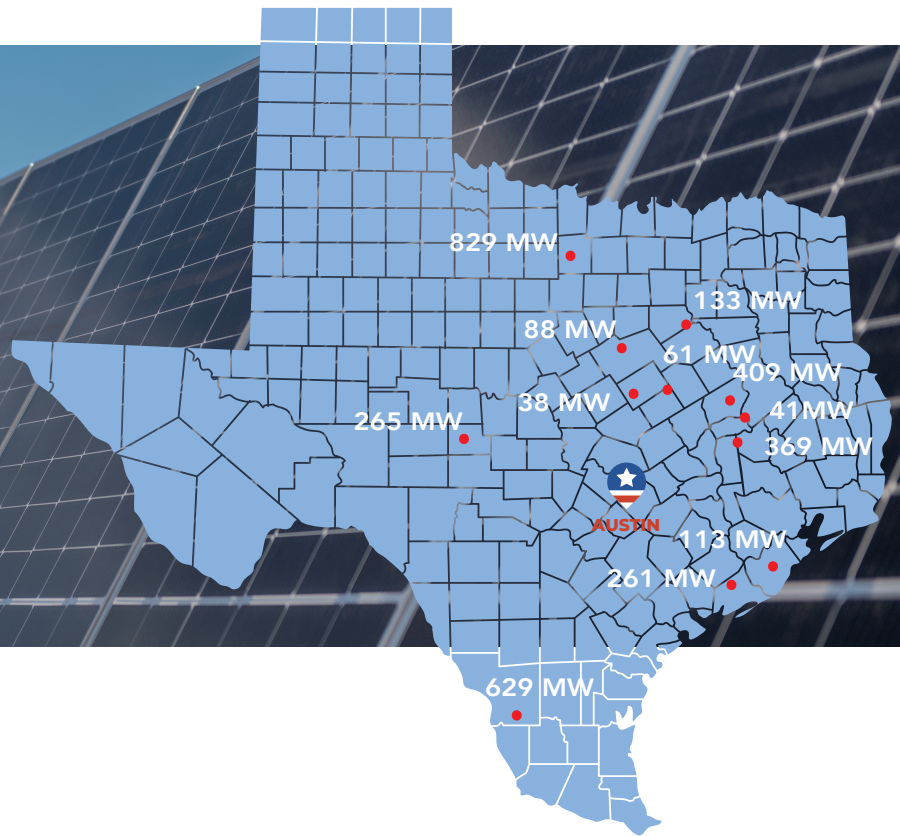

Our solar technology supports Texas grid resilience, reducing emissions and delivering energy independence while prioritizing equity in clean energy job access.

“Being a woman in solar means standing at the intersection of innovation and impact. Every day, we get to help shape a future where clean energy is accessible, and where diverse voices lead the way.”

Jennifer Sulyman
Marketing and PR Director, USA
