

“

After leading as a Captain in the United States Army, joining EliTe Solar let me continue serving a greater mission—driving clean energy and making a global impact. ”

Ryan Adams

Director of Sales
U.S. Army Veteran
(Former Captain)

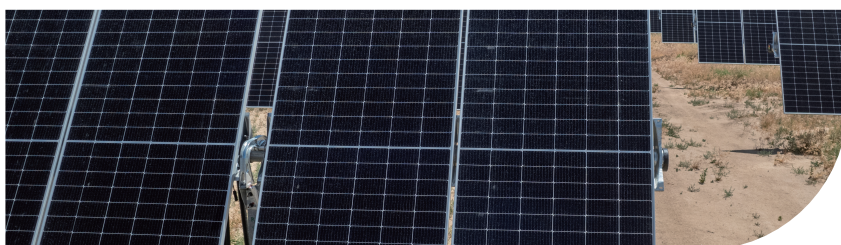

CALIFORNIA

Bringing Solar Manufacturing Jobs to America:

We are scouting locations for a U.S. solar cell factory, creating at least 600 new American jobs by 2026, focused on skilled trades and veterans.

California-Based & Global Reach:

Since 2007, EliTe Solar has maintained its U.S. HQ in Pleasanton, CA. We are committed to expanding American manufacturing in California and across the country.

Reducing Dependence on China:

Our China-excluded manufacturing policy ensures ethical sourcing and aligns with California's commitment to human rights and fair labor. Our only presence in China is an office and logistics team.
